

Pre-Testing

Texas Health
Center for Diagnostics & Surgery
PLANO

Thank you for selecting Texas Health Center for Diagnostics & Surgery for your upcoming surgery.

An EKG will be required if:

- You are 60 years old or older
- History of high blood pressure
- History of cardiovascular disease
- Over 40 years old with history of diabetes
- Take Digoxin

If you have had an EKG performed within the last 6 months, please provide copy to our Pre-Testing Department at (972) 403-2856.

Chest x-rays and lab tests are not required unless specifically ordered by your surgeon, or are medically indicated. If your surgeon has requested that you be "typed and screened" you must arrange for this test no sooner than 72 hours before your scheduled surgery date. For your convenience, Texas Health Center for Diagnostics & Surgery has a Pre-Testing Department where all pre-operative testing can be completed. To arrange an appointment, please call our scheduling staff at (972) 403-2838 between 7:30 a.m. and 5:00 p.m. If pre-testing services will be handled by specific providers outside of the hospital, please be certain to have all test results faxed to our Pre-Testing Department at (972) 403-2856 as soon as possible.
